

Municipal Class Environmental Assessment Stormwater Management Master Plan – Phase II Notice of Study Completion – 16 September 2026

The Town of Collingwood, in partnership with Greenland International Consulting Ltd., has recently completed Phase 2 of the Stormwater Management Master Plan (SWMMP) following a Municipal Class Environmental Assessment (Class EA) process for a Schedule 'B' undertaking, as defined by the Municipal Engineers Association. Phase 1 was completed in January 2022 and since then, preferred solutions to mitigating flooding issues have been identified through the Class EA study. See the following for a summary and next steps for this Master Plan.

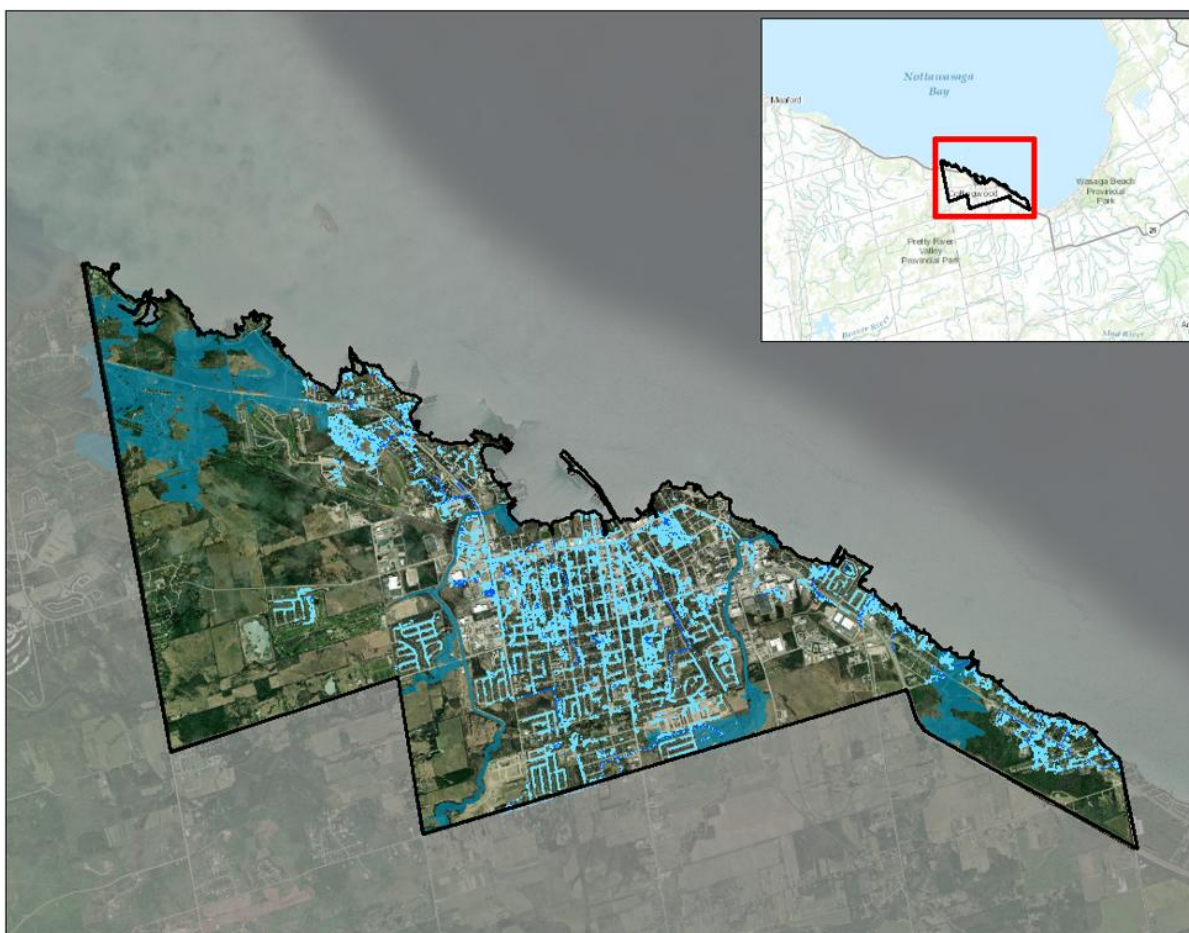

Figure 1 Study Area

Like all municipalities dealing with the impacts of a changing climate, the Town of Collingwood is preparing for environmental and weather-related change through several initiatives, including the completion of the SWMMP. This plan includes comprehensive flood management and

mitigation planning developed through years of engagement, assessments, studies, and consultation with subject matter experts.

The SWMMP will serve as a long-term planning document with recommendations of stormwater management strategies and infrastructure improvements for the next 25-years. This framework will guide future development and infrastructure upgrades to ensure the stormwater system performs effectively under changing conditions.

Highlights of the SWMMP:

- Identification of stormwater management challenges, risks, and opportunities;
- Development and evaluation of alternative solutions;
- Assessment of potential environmental, social, cultural, and economic impacts;
- Selection of preferred solutions; and
- Recommendations of mitigation measures and implementation strategies.

The SWMMP Report is available for review on [the project's Engage Page](#), and was presented to Committee of the Whole at the August 10, 2026 meeting and endorsed by Council on September 14, 2026.

To provide comments on the project, or if you require alternative accommodations to view the Final Report, please contact either of the project representatives listed below before **5:00 PM local time on October 19th, 2026**.
