Installation of a caisson for the new onsite sewage pumping station valve chamber

# Project Progress

Structural caisson installation for new Membrane Filtration building

Structural caisson compression load test in progress.

# Progress Since Last Update

- Successful completion of bypass chamber leak test and structural caisson load test.
- Drilling for caisson piles continues for excavation and foundation work.
- Temporary Frazzle Ice system site acceptance testing complete.
- Paused dewatering and final reports were sent to the Ministry as dewatering no longer needed.
- The Public are reminded to please be mindful this is an active construction site with equipment entering and leaving regularly.
